

UI-UX graduation Project

Project Name :- Sheryan

Brief description :-

Sheryan is a smart platform designed to save lives by connecting blood donors, hospitals, and blood banks through a real-time digital network. It aims to eliminate the randomness of searching for blood donors on social media by providing a live map of blood stock levels and an intelligent notification system that alerts nearby donors to urgent cases in real-time.

Team information:

Team Name :- Designly.

Team Members :-

1- Roaa Wael.

2- Razan Mohammed Hasan.

3- Mohammed Ebrahim Abdelmajeed.

4- Mohammed Mohammed Abdelmajeed.

Team Roles & Responsibilities :

Roaa Wael | UX Researcher

Conducting user research (interviews and surveys) to understand blood donors' needs.
